Agenda

10:30 Welcome and a few words from the CEO

Special consultation on the 2019 Schedule of Contributions

10:45 Objectives of the consultation meeting

10:50 Curbside recycling in the context of crisis

10:55 2019 SoC: updated parameters

11:05 2019 SoC: contribution table and rules

11:20 Question period

Break

11:45 Towards a fee evolution

12:00 Projects to benefit companies in the local and global contexts

12:15 Question period

12:25 Conclusion

October 25, 2018

Objectives of the consultation meeting on the 2019 Schedule of Contributions

- Present the context that influences the net costs and Schedule of Contributions
- Submit the draft 2019 Schedule of Contributions for consultation
- Collect feedback from companies and organizations

Impacts of the closure of Chinese markets felt across the curbside recycling value chain

- Collapse in material sales prices (mixed fibres and plastics)
- Accumulation of materials due to the lack of markets
- Temporary and permanent sorting centre closures
- Québec sorting centres' operational and financial challenges exposed in the media
- Loss of citizens' confidence in the capacity to recycle the materials that are collected
- Requests by sorting centres to reopen contracts with municipal organizations

ÉEQ's involvement and actions to limit the impacts and document the situation

- Development and dissemination of positions on potential solutions to mitigate the crisis
 - Contributing companies will not pay to landfill materials
 - A government emergency fund is required to support sorting centres
- In partnership with RECYC-QUÉBEC, launch of a characterization study of sorting centre output material to determine the number of bales sold

ÉEQ's involvement and actions to limit the impacts and document the situation

- Contributions to several meetings
 - Sorting centres and conditioners
 - Broad consultation on curbside recycling led by the environment minister
- ÉEQ appointed to the *Comité en appui à la mise en œuvre du plan de travail sur l'évolution de la collecte sélective* assembled by the former environment minister
- Resources for municipalities seeking support in their search for solutions

\$14M in government funding to support the industry and municipalities

 Funding of 7 projects to optimize materials sorting and conditioning activities (\$3.5M) and enhance the quality and outlets for recyclable materials collected through curbside services (March 2018)

Recommendations by the minister's Comité de l'industrie:

- Fund 5 projects (\$2.5M) to optimize sorting activities (follow up to the program launched in March) (July 2018)
- Start of a funding program for curbside recycling sorting centres (\$4.6M) (July 2018 to January 2020)
- Development of a call for proposals to determine outlets for fibres from curbside collection (\$3.5M) (upcoming)

Compensation plan

Reminder: important dates

	2018 SoC
Submission of reports	October 9, 2018
1st instalment	November 9, 2018 80%
2nd instalment	January 26, 2019 20%
Supporting documents for the credit request for recycled content	November 9, 2018
Deadline to request changes	October 9, 2019

Data updates Characterization study

Four-part 2015-2017 municipal waste characterization study (ÉEQ and RECYC-QUÉBEC)

Focus	Period	Expected results
Residential	2015-2017	 Recovery rates per material Composition of materials generated by households (curbside recycling and waste)
Industrial, commercial and institutional organizations	2016	 Service profile (2016) Completed with a survey filled out by 2 000 Québec ICIs (ÉEQ study) - fall 2017
Away from home	2016	 Recovery rate per material and location (major arteries, parks, etc.) Composition of materials (curbside recycling and waste)
Sorting centres	2017-2018	 Composition of materials collected through municipal curbside recycling programs entering sorting centres

Data updates

Activity-based costing (ABC) model: no change from the 2018 SoC

 Allocation of municipal net costs between three material classes published by the Québec government in May 2018

Class	2018 SoC	2019 SoC
Newspaper	8.3%	8.3%
Printed matter	20.9%	20.9%
Containers and packaging	70.8%	70.8%
ÉEQ total share	91.7%	91.7%

Updates to inputs more complex in the context of the recycling crisis and late submissions by companies

Basic formula:
 Estimated municipal costs
 Expected quantity

Average rate

Two inputs with significant impacts

Municipal net costs	Expected quantities	Rate

- An increase in net costs impacts the rates of all materials in the same way
- A reduction in quantities impacts the rate of the material itself and the rates of the other materials in its class (direct link)

Establishing the 2019 Schedule of Contributions

Updated inputs

Parameters	
1.Estimated 2018 municipal net costs	X
2. Indemnity to RECYC-QUÉBEC	X
3. ÉEQ fees and other provisions	X
4. Cost allocation between the three classes of materials	
5. Expected quantities reported by companies	X
6. Recovery rates (characterization study)	X
7. Net cost of materials (ABC study)	

1. Municipal net costs Concerted approach to reduce risks

- The 2019 SoC aims to compensate the net performance and efficiency costs of municipal curbside collection programs in the 2018 calendar year
- The approach was finetuned in the context of the crisis

Estimating the costs eligible for compensation by ÉEQ in a period of volatility:

- Involvement of ÉEQ's municipal services team to gain from their follow ups and approaches with municipalities
- Close collaboration with RQ to obtain the most recent data on the reopening of municipal contracts
- Approach and analysis of the contracts of the top 20 municipal organizations
- Emergence of a trend in 2019 to support the estimated costs for 2018

1. Municipal net costs

Detailed methodology to account for specific variations in large municipalities

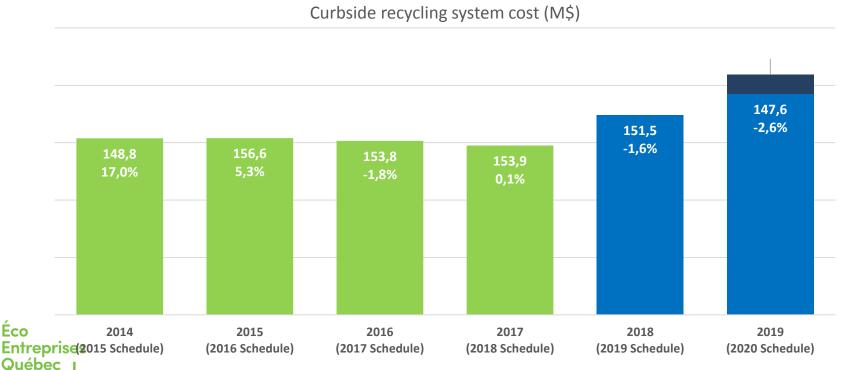

Because a municipality's compensation is calculated based on its performance as compared to that of its group, the detailed methodology enables us to account for the anticipated costs for each municipality in order to determine the total net costs to be compensated

- Sorting and conditioning costs assessed separately from collection and transport costs
- Each contract reopening and renewal is considered
- Efficiency and performance factors automatically calculated based on the municipal group

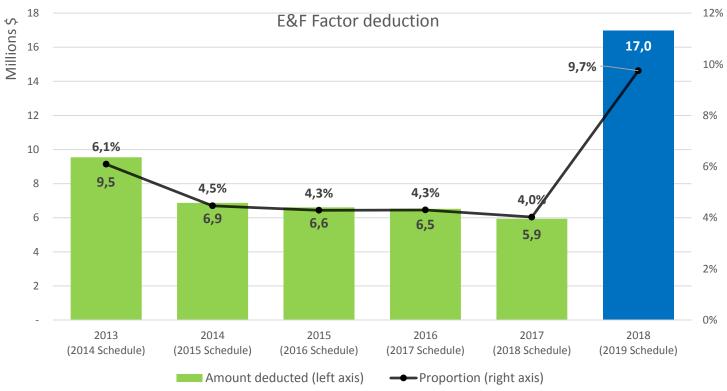

Estimated 2018 system costs

- Estimated system costs for the 2018 calendar year: \$174.1M
- Impacts of the crisis fully felt in 2019
 - Effects of reopened contracts on an entire year
 - New contracts based on current prices

Performance and efficiency (P&E) factor

- The P&E factor makes it possible to deduct a significant share of the net costs compensated for municipalities that deviate from the group average
- Estimated deduction of 9.7% in 2018: \$17M

Municipal costs eligible for compensation (collection, transport, sorting and conditioning)

The costs used to compare the 2018 and 2019 SoCs are rate based and therefore estimated

	2018 SoC	2019 SoC
Estimated Municipal net costs excluding taxes	\$146.5M	\$165.8M
Québec sales tax (QST)	\$7.0M	\$8.3M
Estimated municipal net costs	\$153.4M	\$174.1M
Deduction for non-designated materials (-6.6%)	\$(10.1)M	\$(11.5)M
Deduction for P&E factor	\$(6.4)M	\$(17.0)M
Municipal management fees (8.55%)	\$11.7M	\$12.5M
Total municipal net costs eligible for compensation	\$148.6M	\$158.1M
Variation	- 3.9%	+ 6.4%

2. Other costs (ÉEQ expenses and other provisions)

Supporting ÉEQ's projects and activities in connection with the value chain

	2018 SoC	2019 SoC
ÉEQ fees	\$5.5M	\$5.5M
Bad debt provision	\$2.9M	\$3.0M
Innovative Glass Works plan	\$1.8M	\$1.8M
Printed matter fund	\$(1.5)M	0.0M
Provision for recycled content credit	\$0.6M	\$0.5M
Anticipated reports - low-volume producers	\$(1.4)M	\$(1.6)M
RECYC-QUÉBEC indemnity	\$2.7M	\$2.8M
Total - other costs	\$10.6M	\$12.0M
Variation	+ 0%	+ 13.2%

2. Other costs (ÉEQ fees and other provisions)

Use of printed matter and containers and packaging funds to limit the impacts of the increase on companies

	2018 SoC	2019 SoC
Total - other costs	\$12.1M	\$12.0M
Printed matter fund	\$(1.5)M	\$(2.0)M
Containers and packaging fund	\$0M	\$(2.0)M
Total - other costs and funding	\$10.6M	\$8.0M
Variation	+0%	- 24.5%

3. Cost overview

Cost increase mitigated by injecting funding

	2018 SoC	2019 SoC
Municipal net costs eligible for compensation	\$148.6M	\$158.1M
ÉEQ share (set by order)	91.7%	91.7%
Municipal net costs - ÉEQ share	\$136.3M	\$145.0M
Other costs with funding	\$10.6M	\$8.0M
Total costs considered to calculate company contributions	\$146.9M	\$153.0M
Variation	-1.7%	+ 4.2%

4. Expected reported quantities

The expected reported quantities for the 2019 Schedule of Contributions are those placed on the market in Québec in 2018.

Overall decrease as compared to 2018 (-2.0%)

Entreprises Québec 1

The digitization of print matter continues: 140 kt vs. 150 kt (-6.7%)

5. Residential recovery rate 2015-2017 results

- Overall average rate of 63.6% remains unchanged
- Recovery rates relatively stable for all materials
- Slight impact on the SoC
- Detailed results available on our website

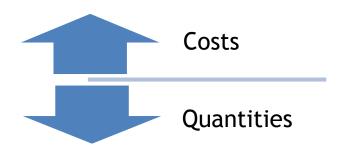

Overall average rate including funding

6.3% increase in the average rate as compared to the 2018 SoC

	2018 SoC	2019 Soc	2019 SoC
		No funding	
ÉEQ total contribution	\$146.9M	\$157.0M	\$153.0M
	- 1.7%	+ 6.9%	+ 4.1%
Estimated reported quantities	655 kt	642 kt	642 kt
	+ 2.5%	+ 2.0%	+ 2.0%
Overall average rate	\$224/t - 5.5%	\$244/t + 9.0%	\$238/t + 6.3%

Increase for printed matter (PM)

\$2.0M from the printed matter fund to mitigate the increase

	2018 SoC	2019 SoC No funding	2019 SoC
Total costs - PM share	\$32.9M	\$34.6M	\$34.6M
Provision credit for recycled content	\$0.5M	\$0.4M	\$0.4M
PM fund	\$(1.5)M		\$(2.0)M
Total contribution	\$31.9M	\$35.0M	\$33.0M
	- 3.6%	+ 10.0%	+ 5.0%
Expected reported quantities	150 kt	140 kt	140 kt
	- 1.9%	- 6.7%	- 6.7%
Average rate	\$212/t + 5.6%	\$249/t + 18.0%	\$235/t + 10,9%

Rates

Increase for containers and packaging (CP)

\$2.0M from the containers and packaging fund to mitigate the increase

	2018 SoC	2019 SoC No funding	2019 SoC
Total costs - CP share	\$115.7M	\$121.8M	\$119.8M
Provision credit for recycled content	\$0.1M	\$0.2M	\$0.2M
CP fund			\$(2.0)M
Total contribution	\$115.8M	\$122.0M	\$120.0M
	- 5.3%	+ 5.4%	+ 3.6%
Expected reported quantities	505 kt	502 kt	502 kt
	+3.9%	- 0.6%	- 0.6%
Average rate	\$228/t - 6.7%	\$243/t + 5.7%	\$239/t + 4.9%

Rates

Rates - printed matter

Higher rates due to the increased net costs and the lower expected quantities

	2018 SoC	2019 SoC	Δ 2019
Printed matter - Average rate	212 \$	235 \$	10.9%
Newsprint inserts and circulars Catalogues et publications	\$184	\$205	11.1%
Magazines Telephone books Paper for general use	\$269	\$295	9.7%
Other printed matter			

Rates - paper/cardboard

Increase in rate lower than the average for all fibres owing to their good recovery rates and the increase in estimated reported quantities

	2018 SoC	2019 SoC	Δ 2019
Paper/cardboard - Average rate	\$194	\$202	4.3%
Corrugated cardboard Kraft paper shopping bags and	\$176	\$184	4.2%
packaging	\$176	\$184	4.2%
Boxboard and other paper packaging	\$194	\$201	3.9%
Gable-top containers	\$187	\$192	2.3%
Laminated paper	\$274	\$288	5.1%
Aseptic containers	\$224	\$235	5.1%

Rates - plastics

Increase in rates lower than the average for most plastics HDPE bottles: decrease due to their good recovery rate Polystyrene: Increase due to lower quantities and stable recovery rate

	2018 SoC	2019 SoC	Δ 2019
Plastics - Average rate	\$342	\$360	5.0%
PET bottles and containers	\$274	\$285	4.0%
HDPE bottles	\$107	\$110	2.5%
Laminated plastics	\$447	\$474	6.2%
HDPE and LDPE shopping bags	\$447	\$474	6.2%
Expanded polystyrene for food products, expanded and non-expanded protective polystyrene	\$735	\$793	7.9%
PVC, polylactic acid (PLA) and other degradable plastics	\$735	\$793	7.9%
Other plastics, polymers and polyurethane	\$278	\$288	3.9%

Rate - aluminium

Higher rates for aluminium

Increase due to a lower recovery rate

	2018 SoC	2019 SoC	Δ 2019
Aluminium - Average rate	\$169	\$181	7.6%
Aluminium food and beverage containers	\$169	\$181	7.6%
Other aluminium containers and packaging	\$169	\$181	7.6%

Rate - steel

Increase lower than average due to their good recovery rate

	2018 SoC	2019 SoC	Δ 2019
Steel - Average rate	\$169	\$173	2.6%
Steel aerosol containers	\$169	\$173	2.6%
Other steel containers	\$169	\$173	2.6%

Rate - glass

Increase lower than average due to their good recovery rate

	2018 SoC	2019 SoC	Δ 2019
Glass - Average rate	\$168	\$175	4.1%
Clear glass	\$168	\$175	4.1%
Coloured glass	\$168	\$175	4.1%

Low-volume producers

No change to low-volume producers' flat fee eligibility Increase in flat fees proportional to the rate average

Tonnage generated criterion	Turnover criterion	2018 SoC	2019 SoC
1 to 2.5 tonnes		\$420	\$450
2.5 to 5 tonnes		\$890	\$945
5 to 10 tonnes		\$1 775	\$1 885
10 to 15 tonnes	\$1M to \$2M	\$2 965	\$3 150

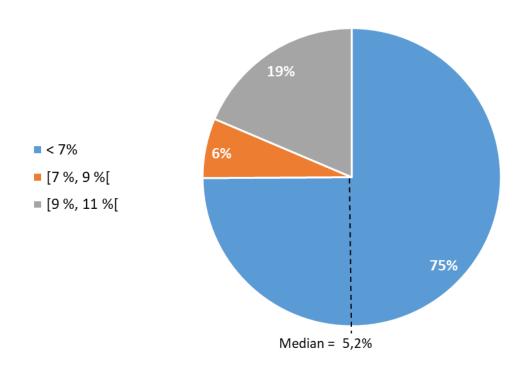

Impact on companies

75% will experience an average or below-average increase

25% will experience an above-average increase

Invoice variation

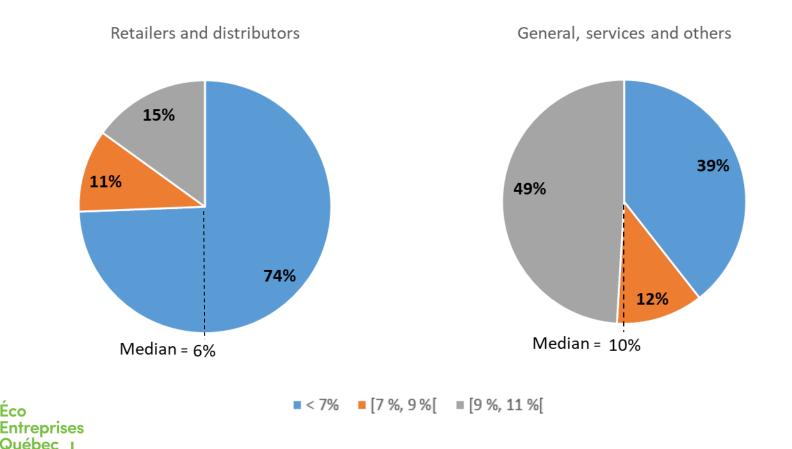

Impact on activity sectors

Services companies will be hit harder

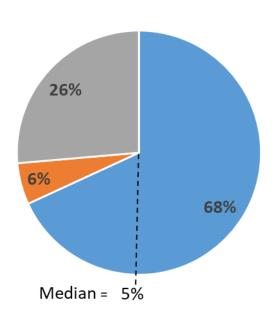

Retailers will experience an overall average increases

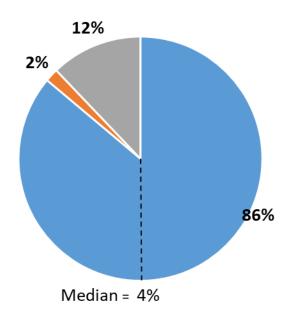

Impact on activity sectors

Manufacturing companies will generally have increases berlow the average

Durable goods manufacturers

Consumers goods manufacturers

Updates to the rules of application and minor changes

- Updated reference years
- Earlier deadlines to file a report and pay a contribution following the coming into effect of the Schedule of Contributions
 - 60 days to file a report (instead of 90 days)
 - 90 days to pay the first instalment of 80% of the contribution for detailed reports and 100% for flat fees (instead of 120 days)
 - 150 days to pay the second instalment of 20% of the contribution for detailed reports
- Simpler eligibility requirements for voluntary contributors based on reported quantities (without authorization for payment exemption)

Payment deadlines

- The deadline to submit a report for the 2018 Schedule of Contributions was October 9. The deadline to pay the first instalment of 80% is November 9, 2018.
- If the **2019 Schedule of Contributions** is published before May 31, 2019, the first instalment will be due in summer. The second will be due in fall 2019.
 - Preliminary report available on March 1, 2019
 - Instalment payments on a set date still under study

	2018		20	19	
	T4	T1	T2	Т3	T4
2018 SoC	80 % Nov. 9	20 % Jan. 9			
2019 SoC				80% August	20% October

A clear process

Step	Date
Adoption of the draft SoC and consultation program	October 15, 2018
Consultation meetings	October 23 and 25, 2018
Consultation period	October 23 to November 15, 2018
Adoption of the proposed 2019 SoC and consultation report presented to RQ	December 7, 2018
Submission of the proposed SoC and consultation report	Before December 31, 2019
Recommendation of the proposed SoC by Rotto the Québec government	Q January 2019?
Adoption of the 2019 SoC and publication in the Gazette officielle du Québec	n ?
