

Mylène Fugère

Senior Advisor, Curbside Recycling Optimization

Trained as a chemical engineer, Mylène Fugère is a senior advisor in curbside recycling optimization at Éco Entreprises Québec (ÉEQ).

Ms. Fugère has worked at ÉEQ since 2010 and has been responsible for monitoring projects pertaining to the recyclability of packaging and strengthening recycling markets. She played a central role in the planning and deployment of the Innovative Glass Works plan. Ms. Fugère is currently working on the development of best practices for sorting centres and offers customized guidance to municipal administrators regarding materials sorting.

Ms. Fugère holds a Master's degree from École Polytechnique de Montréal with the CIRAIG on the analysis of environmental impacts and ecodesign of manufactured products.
