

# MATERIALS RECOVERY IN PUBLIC PLACES

## CITIZENS WANT THE OPPORTUNITY TO RECYCLE MORE

We know that Quebecers are already recycling materials when they're at home, but what do they do when they're elsewhere? Éco Entreprises Québec called on CROP Inc. to find out.

## IN PUBLIC PLACES...

When materials recovery equipment is available in public places, **83%** of Quebecers always use them, while **15%** use them only occasionally.

**83%**  
ALWAYS

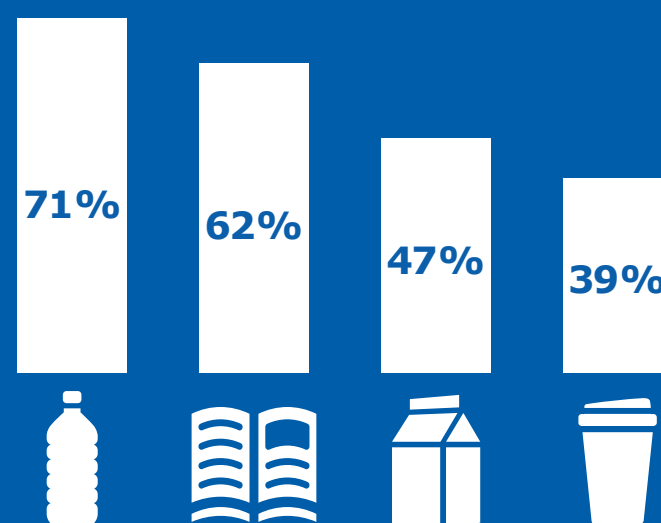

**15%**  
OCCASIONALLY

**2%**  
NEVER

Respondents indicated that they used the bins mainly to recycle:

- water bottles
- les journaux et autres imprimés
- les contenants de lait ou de jus
- les gobelets de café

Almost **three-quarters** of respondents (**74%**) would like to have more access to materials recovery equipment in public places, particularly in parks and along commercial streets.
